Biljana Taneska · Science teacher

🔑 Command Terms at a Glance

Find the command term ➔ look at the picture ➔ know what to do

⚡ Short answers | 🔢 Calculations | ✏️ Drawing and graphs | 🗂️ Organizing information | 💡 Describing and explaining | ⚖️ Thinking and judging

short answer ⟶ deep thinking

⚡ Short answers – Just give the answer. No explanation needed.

Define
Exact meaning of a word

Identify
Pick it or name it

List
Several short answers

Measure
Use a tool to get a value

Recall
Remember what you learned

Select
Choose from a list

State
A short fact, no reason

Write down
Copy the answer from the info

🔢 Calculations – Use numbers. Show your working.

Calculate
Work it out, show steps

Determine
Find the only answer

Estimate
A sensible guess with numbers

Find
Get the answer, show working

Show
Every step, written out

Solve
Use the right method

Verify
Prove the answer is right

✏️ Drawing and graphs – Show it as a picture, diagram or graph.

Annotate
Add notes to a picture

Construct
Build a diagram or structure

Draw
Accurate, ruler, labels

Label
Name the parts

Plot
Mark points on a graph

Sketch
Quick shape, key features

Biljana Taneska · Science teacher

🗂️ Organizing information – Sort, arrange or give the main points.

Classify
Sort into groups

Document
Credit your sources

Organize
Put in a clear order

Present
Show it clearly

Summarize
Main points only

💡 Describing and explaining – Write more. Give details and reasons.

Outline
Brief main points

Describe
Detailed picture in words

Explain
What happens + WHY

Interpret
Find the pattern, conclude

Demonstrate
Prove it with evidence

Formulate
Say it clearly, precisely

⚖️ Thinking and judging – Think deeply. Use evidence. Make a decision.

Analyse
Break it down

Apply
Use it in a new situation

Comment
Give your judgement

Design
Make a plan

Discuss
Both sides, then decide

Evaluate
Strengths vs weaknesses

Justify
Back it up with reasons

Suggest
Propose an idea

💬 State vs 🖼️ Describe vs 💡 Explain

State = the fact.
Describe = what happens, in detail.
Explain = what happens + **why**.

💡 Explain vs 🛡️ Justify

Explain = give the reasons **how/why** something happens.
Justify = give reasons that **support your answer** or choice.

🗣️ Discuss vs ⚖️ Evaluate

Discuss = both sides, then a conclusion.
Evaluate = strengths + weaknesses, then a judgement.

📐 Draw vs 〰️ Sketch

Draw = accurate, ruler, scale, labels.
Sketch = quick, general shape, key features labelled.

🧮 Calculate vs ≈ Estimate

Calculate = exact number, show steps.
Estimate = sensible approximate value.

✅ Before you hand in

Did I underline the command term?
Did I write the right amount?
Did I include units?

Based on the IB MYP command terms for sciences. Simplified for students.
